

February 3, 2010

Dear Minister Shea,

Many people are concerned about the state of wild Pacific salmon and whether your Ministry is doing enough to maintain these fish. The reports that the Fraser sockeye maybe infected with a retrovirus is disturbing and alarming. We, the undersigned, believe your Ministry, Fisheries and Oceans Canada (DFO), has the responsibility to do everything possible to identify what this virus is, where it came from and if its' affect can be reduced. To that end we are writing to inform you that we want DFO to do a genomic analysis and appropriate tests on farm salmon, both Chinook and Atlantics, for retroviruses. We also ask that you do everything possible to confirm the identity of this potential virus. Fraser sockeye are an important food source to thousands of people.

This is the only responsible action that you can take. There is no good reason to avoid this investigation. We need to be able to move past this. I let people know they could join me in making this request to you. Below are their signatures and their.

*No open net pen farmed salmon*

*Jobs are not worth the sacrifice of salmon.*

*Let science be our guide*

*Something has to be done about the Salmon diseases before it is too late.*

*great work, let's keep the pressure on.*

*Do it!*

*As a taxpayer, voter, and painter of coastal art, I demand that you do everything in your power to protect the BC coast and its human communities and ecosystems from the ill effects of fish farming. This is your responsibility!*

*thanks*

*do the study- good or bad we want to know  
blessings and thanks for your good work*

*Thank you!  
It is high time for the general public to get more info*

*Please do not risk losing out salmon. For Aboriginal people it is essential to their lives. for the rest of us it is a gift from the sea.*

*It is crucial to the survival of several different species of animals including Human Beings that we know the truth about what is happening with Farmed Salmon feedlots. All Records from the farmed Salmon Industry in B.C. need to be available for scrutiny By Dr Millerf.*

*Minister Shea should resign  
STOP HIDING THE FACTS !!!!*

*GOVERNMENT IN HIDING?*

*I find it appalling that the scientists who are studying, and monitoring our oceans are not given ALL the information relevant to their research. Our civil servants need to protect our oceans and all the things living in the oceans on behalf of the citizens of Canada.*

*I joe the public would like to know more*

*keep up all the good work*

*We should have knowledge fo everything that happens in our waters--the Government should ask and receive all information that is known*

*Thanks Alexandra!*

*Please address this issue immediately.  
You have the right to sleep at night knowing that you have done everything possible to protect our wild salmon resource for generations to come.*

*We expect DFO and our government to provide leadership in the scientific community. As the elected and hired professionals appointed by people of this country to protect and manage our precious resources we expect no less.*

*We need impartial scientists testing for any and all microorganisms that threaten our native wild fish stocks.*

*Salmon farming has turned out to be a bad idea. The Scientific needs to be gathered to stop the virus now not try to contain it later.*

*Thanks*

*Things need to happen on this subject, so I sign this petition even though I do not live in BC, but in Europe, where the fishing industry also has enormous problems. This connects us all in the fight!*

*Our Oceans need our diligence*

*Thanks for doing this*

*Farm inland: clean the water before returning it!*

*stop fish farming in our oceans*

*US citizen that eat salmon twice/week. Will not eat farmed salmon. We must do everything we can to save wild salmon.*

*hope this works!*

*I'm really really really sick of bureaucratic wing-nuts looking after our fisheries. Stop Atlantic salmon farming on the west coast. Who's got a vested interest in this stupidity? People should be going to jail over this.*

*Please, do the right thing.*

*Why is our government so willing to take the risk. There should be no question that the right response is to ensure our countries natural resources are safe now and for future generations. That is a critical responsibility!*

*Do the right thing*

*why is it so hard to get the government to do the right thing?*

*This is so important....lets stop the greed for money & start paying attention to the scientists etc who actually know whats going on in this industry.*

*I am alarmed and very frustrated by these Ocean Feedlots in our waters of British Columbiaa frustrated by these foreign multi nation*

*Thank you Alexandra Morton for all your efforts. I believe you made the right decision to decline the NDP invitation. I believe you can be far more influential by working as you have been.*

*the public wants and deserves quick action on this issue. PLEASE ACT NOW. Thank you This is a very important matter.*

*I strongly support this issue.*

*Greed is being replaced with abundance.*

*What do the companies have to hide?*

*save the wild salmon*

*There should not have to be a petition to ensure that this necessary assessment is carried out. The mandate of this and all Ministers of the Crown is to protect the public interest.*

*Needs to be done*

*Thank you for all the work you are doing  
Please take this seriously!*

*SHUT DOWN OPEN NET FISH FARMS, YES I'M YELLING.*

*Please help our wild salmon!*

*A CONCERNED CITIZEN*

*Time for fish farms to be regulated for the benefit of wild fish and other sea life.  
Please ACT now...let's stop this farming practice while we still have wild stocks to save!  
You gotta do more to protect our fishing industry*

*The lack of interest the DFO is showing towards the West Coast Salmon Fishery is disgusting.  
Please support the health of our native salmon!  
Evidence from around the world suggests that these salmon pens are destructive to all marine  
life on any coast where they have been. Thank you for researching this issue fully.  
Save our wild salmon their worth more than farmed corporate fish.*

*Access to disease information is vital for if fish farms are not a problem or the problem we need  
to find out what is. Removing the cloud of suspicion over them is important as we seek to save,  
protect, and enhance our wild salmon populations. I assume the minister is interested in saving,  
protecting and enhancing our wild salmon populations?*

*We need action now, to do otherwise is contributing to the destruction of British Columbia's  
most precious resource  
end Salmon farming  
check fish farms for virus  
Do the right thing for the people of Canada*

*When you mess with Nature you will lose, which in this case, means humanity.  
dont let our wild salmon stock died like the norwegian did*

*We have to get rid of Gail Shea as Fisheries Minister. She appears to be disinterested in British  
Columbia's salmon, only the East Coast seals!  
Do not hinder the science.*

*Please DO what is RIGHT!*

*Thank you.*

*Now that the federal government has brought the aquaculture industry under it's jurisdiction it  
needs to ensure that all environmental regulations are being adhered to. The virus issue needs  
to be fully investigated. As a voter and a concerned resident of B.C. I firmly believe that our  
Pacific Salmon needs to be protected and have grave doubts that the aquaculture industry's  
impacts on the wild salmon is negligible. Remember that a federal election will be soon and for  
me this is a top issue.*

*Alex you are a saint!*

*This is is one of the most important issues of our time. Please identify where this virus is coming from.*

*keep up the good work!*

*start by getting rid of the Atlantic salmon first on the BC coast someone should be held accountable for this mistake*

*It's criminal that the salmon farms are being allowed to withhold information related to disease and parasites when our so much is at stake with our wild stocks. It's an irresponsible and destructive industry, and they are being allowed to call the shots in our waters.*

*I am not confident that environmental protection for the ocean and our salmon is a priority of our government or that the government even understands the critical imperative to control salmon aquaculture activity in our ocean.*

*thank you Alexandra for your very important work*

*Time to wake up ...*

*Cheers*

*Get Norway out and stop these destructive farming practices.*

*This issue is not going to go away. Please address it. Take the opportunity to show that the Federal government does give a damn about the environment.*

*Fish farm production should only be allowed ON shore*

*Press on. I believe we can win the battle particularly with the progress being made on closed containment fish tanks*

*Keep up the great work. The salmon of Clayoquot are depending on us all.*

*I hope that you can address this urgently pressing problem!*

*Your Government promised openness; So did the BC Liberals. We need to have access to the facts regarding our fishery resources. If private fish farms use our public waters they must account for themselves with true facts. If they refuse, they should be kicked out.*

*keep up the pressure*

*It saddens me that the Fraser river sockeye could be affected by this virus. I would encourage all farm salmon lots have this testing done on a regular basis. In our community, most of us do not eat 'farmed salmon' and everyone wants our WILD salmon to remain healthy!*

*Please remove salmon farms from the ocean to land so that the farmers won't contaminate the water for wild fish. Salmon are a resource for the province that needs protecting. Thanks.*

*long live wild salmon*

*This is a very important issue for our province and the ocean waters that surround us. I strongly support this petition for allowing science to do its work!*

*If there are no viral traces to be found, then the farming industry will have nothing to hide (as would counter ISA virus infestations in Chile, Scotland, and New Brunswick); otherwise, positive results would explain the industry's refusal to reveal its ongoing disease records -- as just happens to coincide with the recently revealed 4-year prevalence of a potential new virus strain, source yet unknown. What would they have to hide otherwise?*

*Keep up the great effort!*

*To DFO: This is my backyard, my industry (tourism) and my life. Get control, or get out of the way! I do not support Canada's waters being abused by international companies! better to be safe than sorry especially for future generations - we are already killing this planet - please stop this and help our own coast better to be safe than sorry especially for future generations - we are already killing this planet - please stop this and help our own coast*

*Why would we put the wild salmon at risk?*

*If there is a disease in feedlots and it is allowed to spread, how is that good for the the economics of the farmed industry and the wild industry as well? The wild salmon are not just an industrial resource for us to exploit for our gain. They are connected to the health of the planet. That is a big responsibility. Do not take this lightly. You have been entrusted with this task. We of the world are counting on you to do the right thing to ensure that the balance is kept. Good luck dear. Truth will prevail always.*

*It is shameful that politicians operate as if they are legally unaccountable for their actions while in office. The science is has been there for decades, the people have spoken ... big business should not rule our political system. Willful neglect of duties should be subject to prosecution by law ... Al B.*

*healthy planet, Canada's long term economic well being and wild salmon, they are all part of the same equation. DFO please don't do the same to the west coast as you did with the cod.*

*When will common sense prevail?*

*Only by full access to fish farming sites and monitoring of their operations will we be able to confirm or otherwise the damage that fish farms are causing to wild salmon and the marine environment*

*Wild salmon are essential food for so many species (bears, eagles, ravens, cougars, humans to name just a few); signature animals of BC; animals both on the coast a far inland; the loss of wild salmon populations effects the entire ecosystem from top to bottom. It is hard to believe that in this day in age we are not protecting our wild salmon with every possible resource, study, and*

*law. Wild salmon are the basis of the food chain in BC ... we will be greatly diminished if we do not protect them with all the science we have would be unconscionable stupidity.*

*This is so important!*

*Would like to be on mailing list if it's operational for the U. S.*

*your work is of crucial importance to the future of our fishery - thanks for your extreme good works alex ~*

*guardian watchman*

*Wild sustainable salmon only PLEASE!*

*Staying vegan until we stop killing the planet.*

*There are clearly more questions than answers re BC salmon, and here is a simple way to get at least one answer. Test feedlot salmon.*

*Whose safety?*

*good work*

*have gail shea adopt some of alaskan philosophy towards wild seafood and the support of the commercial fishery and sport industries*

*Give wild salmon a voice!*

*Protect wild salmon*

*NOW IS THE TIME !!*

*give them shit!!*

*If there are no viral traces to be found, then the salmon farming industry should have nothing to hide (as would counter the experience in ISA virus manifestations in Norway, Chile, Scotland, et al); positive results would explain the industry's refusal to reveal its ongoing disease records -- as happens to coincide with the recently revealed findings of a 4-year prevalence of a potential new virus strain that is devastating Fraser River stock, source yet unknown. What should they have to hide otherwise?*

*Good work. I will help all I can.*

*I won't accept anything less than enclosed pens with waste water treated on shore before being discharged into the ocean.*

*It is appalling to me to think that a government would not see this issue as essential. Anything that endangers wild salmon stocks endangers the health of the coast, the health of the people and ecosystems that thrive there. I urge you to fund this research so that the health of the coast can be maintained. I do not have any faith in any government that does not see these environmental issues as paramount.*

*Stop playing Russian Roulette with our wild salmon and the communities, human, forest and wildlife, that depend on their survival. There is no excuse for mismanagement born of wilfullignorance.*

*please make salmonfarmers come clean*

*end open net cage salmon farming*

*We musn't destroy this amazing resource that is so much about BC and the Pacific Ocean. We have already destroyed the East Coast cod fishery! How can our governments be so blind?*

*you have no choice!*

*ENOUGH IS ENOUGH, OPEN "FISH FEEDLOTS" MUST "GO" NOW. OUR COAST CANNOT STAND THIS CANCEROUS PLAGUE ANY LONGER.. GOODBYE & GOOD RIDDANCE TO YOU ALL????????*

*Land locked salmon farms only - like at Swift Agriculture in Aggazis  
Protection for the free - do testing!!  
get the fish farms onto land where they can be controlled  
profit for Marine Harvest does not trump the West Coast eco system*

*It is unconscionable that in 2011 our government is choosing to ignore pleas to save our wild salmon - and possibly other species of wild fish stocks. It is embarassing to think that our country, one of the most progressive in the world, is continuing to turn a blind eye to this pending disaster and is allowing a foreign run company to lay waste our pristine waters and food stocks. Shame on the Canadian Fisheries and government.*

*I follow Dr. Morton's studies and recommendation and agree that we need to manage our Salmon fisheries better. The Norwegian run Salmon farms in BC must be held accountable. Salmon farming must be restricted or stopped until we are certain it does not affect our nature salmon runs. The government has a bad record of managing fisheries as proved with Newfoundland Cod .*

*How much more can the global environment take before a total worldwide collapse happens. the same excuses are bein used as when global warming was an issue. Now global warming has been around so long that it seems to be an accepted fact of life. I am sorry ALEX but there seems to be no peaceful way to stop this total worldwide attack. It makes you wonder what the ulterior motive of this action is.*

*Dear Minister Shea, As a British Columbian and as an archaeologist, I recognize that salmon have not only sustained people but is a source of commerce and even more importantly, Salmon nuture and feed the entire coastal forest eco-system. Marine proteins are a significant soil component miles from any salmon bearing streams and this is supplied by the migrating salmon. The wealth of our wild salmon has huge implications for the whole province and must be protected at all costs.*

*Transparency is required on this issue that threatens wild salmon and all the jobs that they sustain here.*

*honest politicians would not mind taking a polygraph*

*There's simply too much at stake with our wild salmon populations to not sufficiently fund thorough assessments and testing. Thank you!*

*Please remove these salmon farms before it is too late. They have destroyed the environment everywhere they have been set up.*

*support closed containment*

*Salmon are a vital part of the ecosystems of our country.... please consider this research seriously.*

*I have seen great negative changes in salmon populations here on the coast where I have lived for 17 years.*

*I do not believe that either the provincial liberal government of BC nor the federal conservative government are showing any stewardship of the west coast marine ecosystems. If I can't appeal to your sense of conservation why I don't I just appeal to your basic and crass political instincts. Show us that you care!*

*Health of the salmon population, both farmed & wild is tied directly to the health of the individuals that consume them. Look after your people, and they'll look after the country. As an elected representative of the people, it's not only expected of you to perform this as a task of your continued employment, it should also be as a matter of concern for your own health & that of your family!*

*save salmon habitat*

*Your department wiped out the Atlantic cod fishery; PLEASE, do not do the same to the Pacific salmon.*

*great work we are all in your debt.*

*Great job Alex. Keep it up*

*Let's work together for the health of the salmon and ultimately our beautiful BC coastline. It's about time we learn the truth about the impacts of salmon farming!*

*This issue will influence how I vote*

*We want test results!*

*If you cannot do the job resign and allow someone that cares about our wild salmon before you create destruction like the East coast cod. Farmed salmon are unconstitutional and have not gone through any consultations with First Nations or the people that depend on them. Step aside, do the honourable thing, please...*

*save the sockeye!*

*Tenacious and committed to protecting and ensuring the survival of wild Pacific salmon!*

*Can't stop til we win*

*Why not test? It just makes good sense...*

*It is shameful that we have not been kept informed on such an important matter*

*THE SALMON MATTER AND YOUR JOB IS TO SAVE THEM MISTER MINISTER!*

*Please test the farmed salmon for disease.*

*do the right thing!*

*Please help save a precious and crucial part of our planets ecosystem!*

*shut down in ocean fish farms , for sure*

*The public need this information and so do the sockeye.*

*dont mess with mother nature*

*good work*

*let's go*

*appreciation of the work A.M. is doing.*

*Our wild Pacific Salmon are a treasure that has nourished this coast for thousands of years. This gift from Nature and the sea is worth Millions of dollars as it feeds people animals , orcas, birds, and the streams and forests of this coast, the coastal communities, the First Nations, and a huge Tourist and Sport fishery. How can Canada allow this amazing resource to be threatened with disease, pollution of their habitat with chemicals, antibiotics, parasites, hormones, effluent, and escaped non-native fish to profit the foreign owners of open net fish farms in our waters? If this was a safe industry they would be doing it in Norwegian waters. They are banned there , so why let them foul our waters and destroy our wild Salmon? Only closed containment with all residue properly processed to sterilize it should be allowed.,*

*Dear minister: please do your job*

*We have to stop the salmon farm industry*

*Why has this vital scientific information not been made public? Why haven't test results been made public? what testing was done to reach the conclusion that a virus was present in B.C. fish farms and that it may pose a serious threat to wild salmon?*

*Strong Supporter of Anti-Fish Farming Movement*

*Open net fish farming in British Columbia needs to stop, for the survival of our indigenous westcoast salmon*

*Leave no stone unturned*

*get over your political stripes. I would normally vote for your party but you are losing me quickly over this issue. Don't make me a FORMER supporter!*

*Please get the fish farms in BC out of the water. It is causing our salmon to become diseased from disease. Get the Norwegian investors out of our waters. They have been forced out of the European waters because they have polluted their ocean and their oceans are dead zones.*

*Please listen we are wanting to have lots of faith in our leaders.*

*The condition of our animal population worldwide affects us all, please be careful for the sake of all*

*Minister Shea. Please Do Not let Canada be a LATE follower when it comes to protecting our wild BC salmon. Take notice and learn from other countries issues with fish farms located on or over migration routes.*

*Testing for diseases would appear to be a necessity rather than something requested of private fish farms in public waters.*

*We do not trust this industry to self-regulate*

*Common Sense Needed*

*Please, no more farm raised salmon which greatly imperil wild salmon.*

*keep at it*

*Does the government represent the people or corporations? Who should the People support?*

*if the farms are not closed containment systems they should have dfo monitors/biologists on their sites*

*do the right thing!*

***ABSOLUTELY CHECK THE BC SALMON FARMS FOR THIS VIRUS***

*Aquaculture in natural settings require explicit transparency, intensive monitoring and reporting and above all - accountability. Please do your part to make this happen.*

*thank you*

*wild salmon is immensely important to my overall health--wholistic health.*

*Good Luck*

*bring the wild salmon back to the Broughton - fish farms out!*

***SAVE OUR SALMON - YOU ARE THE ONE RESPONSIBLE FOR ALL THESE WILD SALMON. WHY DON'T YOU DO THE RIGHT THING AND LISTEN TO YOUR HEART! YOU HAVE POWER TO HELP A SPECIES THAT CANNOT HELP THEMSELVES. DO NOT BE THE ONE WE ALL REMEMBER AS HELPING TO KILL OUR PRECIOUS SALMON STALK. LISTEN TO YOUR HEART. REMEMBER WHERE YOU CAME FROM, WHO YOU REALLY***

*ARE ASIDE FROM A MINISTER AND DO THE RIGHT THING! HELP OUT DR KRISTINA MILLER AND ALL OF THE WILD SALMON STOCK.*

*I am disturbed by the nature of the recent pro fish farm t.v. advertisement*

*I might have signed before - I can't remember but I really think this needs to be investigated  
Let the wild salmon flourish & please do not allow this fish farming to persist an cause a decline  
in the wild salmon population and leave human.*

*I stand in solidarity with First Nations' people and for protection of Earth and its creatures.  
Thank you for representing the people and our future*

*I think this would be the least the gov't could do!  
Fish farms must be out of the ocean and on land in closed containers. BC residents will keep on  
fighting you until you do this. Do it soon.*

*Please protect our wild salmon.... i will never eat farmed or GMO*

*Perhaps Minister Shea doesn't want the results of the study. They may not fit with her plans to  
significantly increase farms on the Pacific Coast.  
Protect the wild salmon  
Thank-you!*

*As a building contractor, if I drop one branch into a fish bearing creek I will have the ministry  
all over me. Why are foreign companies allowed to dump millions of pounds of effluent directly  
into sovereign Canadian waters?*

*Farmed fish are eating the food of the people of other lands and killing our food and lively  
hoods.*

*I am in full support of this petition and request immediate action, if we are not too late.  
Think about the Salmon! For God's sake, won't you think about the Salmon!?*

*Please follow through on this request. Thank you.  
Let your staff do their job properly and protect wild salmon.*

*There absolutely must save our wild salmon stocks!*

*Demand funding of fish farm investigations especially concerning above mentioned virus.*

*this virus is serious*

*Pleas, for the sake of not only the salmon but the whole ecosystem that depends on them.  
How can Fish Farms operate without DFO acting in the best interests of wild salmon rather than  
the corporations*

*I am angry that my own government has hidden such important information - all the incredible  
work and efforts by thousands of people caring for our wild salmon is not supported by our own  
gov't?!!*

*Please help save our wild salmon*

*We need to create a Green-Blue Belt for Fraser River & tributaries and Coastal Salmon  
mitgration routes to protect Wild Salmon stocks and conservation areas.  
please allow testing!*

*Stop pandering to the will of big companies; listen to the people whom you are supposed to  
represent!*

*What else are they hiding?*

*Thank you*

*Consistently good work. Our children need to believe adults are transparent, honourable in  
their behavior and actively creating a healthy "whole" world. The work being done here helps  
them to feel that some adults are reliable and trustworthy. Thank you,*

*Thank you once again Alexandra for continuing to face these challenges. Minister Shea you must  
heed the wishes of the people to protect the wild salmon. It is inconceivable and unbelievable  
that this struggle continues.*

*Urgent action must be taken on this to protect salmon and other sea life. We demand  
transparency and accountability!*

*When government employees, particularly scientists, see that very important information is being  
suppressed and have the courage to stand up and make it known, that is the equivalent of whistle  
blowing. The Government has stated that whistleblowers should be protected. It will be  
interesting to see how your Government handles this situation.*

*Isn't it DFA? or DAFO? In any case, it's TIME for all good DFO staff to separate completely  
from Shea's Department of Aquaculture.*

*Please allow testing of the salmon*

*I noticed this report in the paper and wondered if and when we would see the details released to  
the public. This is directly related to the issues that I care very deeply about - our fish and their  
habitat. We want an open and frank discussion about the causes of the salmon stock decline.  
This is a critical issue that "must" be fully explored.*

*Please save our salmon now*

*Sickening. It shows great reason to distrust any claim that DFO is supposed to be working for the people of this country.*

*We must keep up the pressure on Minister Shea and her senior staff who choose to ignore how important wild salmon are to the people of the west coast.*

*We should know if this virus is caused by the fish farms.*

*Minister, It is time to do your job and protect the fish and not the business of fisheries. Your inaction could prove to be disasterous for the entire ecosystem of the entire west coast.*

*Please protect one of BC's most valuable responsible.*

*you will not be happy until you have watched the extinction of all wild pacific salmon species on your watch. you should be very proud.....*

*salmon farms have done nothing good for earth or BC, get rid of them NOW*

*Please allow DFO to do the work they are mandated to do as per the Fisheries Act. Stop silencing Canada's government scientists!*

*In light of released information about salmon being infected with a virus that is not yet identified, it is imperative that salmon feed lots be required to release their virus infection data to the public.*

*One has to wonder why this ongoing need to advocate for the survival of our natural resources with our own governments continues to be necessary?*

*Many thanks to Alexandra Morton for her orofessional and tireless work assessing and reporting on the increasingly challenging situation facing the wild salmon population of BC.*

*Minister Shea, do the right thing!*

*Keep up the great work alexandra! I sign all these petitions => you never send too many emails*

*If this information has been collected, access to it must be allowed to a third party for scrutiny to ensure that outside, self serving interests are not to bury something that threatens our indigenous species, and puts tourism, fishing, and our ecosystem in danger*

*This is totally unacceptable for this to continue to be ignored*

*We must not allow the mismanagement of our natural resources to continue.*

*What will benefit BC's salmon will also benefit the east coast atlantic salmon that are also at the mercy of the acquaculture industry.*

*It's time for the government to take this issue seriously. Do your jobs - protect Canadians and our oceans.*

*Minister Shea, this situation is shameful. Please allow your own Ministry's science to function!*

*Please, this is urgent.*

*If you cannot be transparent, you should not be in the public services*

*This information is vital-not only for salmon but for all that depend upon them. the job of our government ought to be to support (financially and otherwise) the basic research needed to understand the world we live in so that we can make informed decisions. No other interests should stand in the way. Our environment is more important than the financial interests of salmon farmers.*

*Please listen and DO the right thing - move salmon farms out of the sea before its really too late!*

*Let us lift our heads out of the sand*

*As we see it here in the Broughton, all fish farms should be tested for all viruses and bacteria or any other kinds of diseases, this should not be a question to ask but should be part of the regulations and/or the licence conditions, Gilakasla, Hereditary Chief Robert Mountain.*

*It is time to make our government officials more accountable to the public that must live with decisions made under the influence of corporate greed.*

*this is of utmost importance*

*This is an appalling lack of responsibility toward the people you are supposed to be serving.*

*Please act in this matter now to protect the pacific coastal ecosystem*

*Disgusting Liberals*

*This is outrageous*

*Go get 'em*

*It is time to prioritize this problem and ACT!!!*

*It's high time that DFO demonstrated some functionality, other than selling our fish for votes.*

*This is very important for Government to address!!*

*We urge you to act to identify this threat a.s.a.p.*

*FOUR years they've had this information? What else are they hiding?*

*Please do your Job and save our Salmon*

*Thank you.*

*Shame on your delay*

*Better management of our world famous fishery must begin now. This resource is not only precious to British Columbians , but to the world!*

*thanks for doing this*

*Gail Shea needs to step down if she refuses*

*Better not*

*It would seem to me that the DFO/Gov't are afraid of what they might find out. It is the DFO's job to protect salmon, not look after the interests of Norwegian fish farm operators.*

*Please give Dr. Miller access. It is vital that we save our sockeye salmon fishery.*

*go girl*

*Please remove the feedlots from BC waters*

*The government(s) have hidden this information from us for 4 years!!!! What the fuck!*

*This government should stop putting its head in the ground and realize its responsibility to the people of Canada and not to the corporations multi national at that.*

*TOURISM IS MORE VALUABLE THAN ANY OTHER RESOURCE/FISHERMEN MAKE UP A LARGE PORTION*

*I am glad you stayed out of politics and will therefore continue with an independent voice of impartiality, although I am an NDP member.*

*This is a critical issue!!!*

*Keep up the monitoring. You can do better here rather than possibly sitting in the Federal House of Commons.*

*When the salmon are infected and can no longer serve as food, which species will we next target?*

*When the salmon are infected and can no longer serve as food, which species will we next target?*

*Shame on you - Do we really want our salmon to go by way of the East Coast Cod?*

*It's very important that wild salmon not contact virus from feedlot salmon. Please let us find out what's really happening with this virus. Thank you!*

*I fully support the goals of this petition. Protection of our priceless wild salmon heritage should be the top priority of DFO. Unfortunately, the wording used in the petition is inappropriately aggressive. To "demand" and "instruct" a minister of the crown to adopt new policy simply spawns resentment and resistance. "Urge" and "strongly suggest" would be more suitable terminology.*

*The DFO needs to GO*

*I remember as a young child viewing the salmon run; we cannot let a rampant virus kill off what is our Canadian right - our right to keep our wildlife and wild spaces alive and healthy!*

*The founders of the IPSFC would be rolling over in their graves if they had any idea how their combined efforts would be dashed by extremely poor management, and even worse political interference.*

*Transparency is essential for credibility of all aspects of the Cohen Commission's work.*

*This is extremely important.*

*give them hell, Alex*

*We cannot lose our salmon. it will be the beginning of the end for all of us if we do!! all creatures will suffer the loss of salmon. please please help them.*

*It is time for you to be open and forthright with all information pertaining to the aquatic life on all coasts of Canada. Hiding this information in order to benefit industry should be criminal! Allow the truth about the newly discovered virus affecting the crucial Sockeye salmon industry to emerge, including testing of caged Atlantic salmon, so that remedial action can be taken.*

*It is imperative that any and all information held by fish farms be turned over immediately in order to verify the virus and its origins*

*It seems obvious to me that fish farms have a detrimental effect on wild salmon numbers - look at the fiords in Norway with fish farms as opposed to those without fish farms in them*

*If you are concerned about Canada then take this action . If you are concerned about your own ignominy then take this action. Whatever your concern this action is the best action you can take.*

*Keep slugging*

*Canadians should be ashamed for allowing the DFO to carry on in such a Fascist manner. Shea and her crowd have to go!!!!  
keep up this essential advocacy*

*What is wrong with our so-called leaders that they do their job of looking out for our interests so badly. It raises the question, and not just with me; "Is someone getting paid off by the fish farm people? And who else pays off our politicians?" It's no wonder people are becoming increasingly cynical about politics.  
support wild fish*

*Lets hold the gov't accountable to our environment and our resources, otherwise we won't have them for much longer!*

*Dear Minister Shea, I also demand your resignation.*

*Come on Folks, it's in Canada's interest to be on top of these issues... What are waiting for WIKILEAKS to get the info out.*

*Act now*

*Withholding this information is criminal.  
Minister Shea needs to resign and let someone competent manage our fisheries.*

*No to Liberals and Conservatives*

*Thank you!*

*Why is this not being looked after Minister Shea? Why are you and your ministry letting politics get in the way of good science? Why do you want to destroy a sustainable wild fishery? letting*

*I love our traditional salmon and want to see it for my children and grandchildren SAVE OUR WILD SALMON NOW, for us and our future PLEASE!!!!*

*No to Liberals and Conservatives*

*I had hoped that the control of government by corporations and money was an American phenomeneae. Apparently not.*

*Keep up the good work!*

*Listen to what Alexandra Morton is trying to tell you!*

*As our elected representatives, you are in office to address our concerns. This is an extremely important concern, with huge economic and environmental implications. Please allow Dr. Miller immediate and unfettered access.*

*Minister Shea, you have been asleep at the wheel for far too long now and the shit is about to hit the fan. Stand up and be counted for a woman of integrity now or suffer the consequences when your failures come into public scrutiny. You need to place your immediate attention on this issue and stand for the people of BC or get the hell out of your office and surrender the responsibility to someone who will serve the people of BC.*

*Very distressing news for a number of reasons. Salmon are so integral to the health of many species it is paramount that both provincial and federal governments take every action possible to protect their health*

*Minister Shea is still asleep at the wheel over here. What on earth are we paying her for? IS she ever going to be counted as someone who actually served the country or not. Doesn't seem like it to me.*

*I am astounded you care so little out wild salmon and will go to great lengths to protect salmon farmers. What are you thinking? Does salmon farming provide you with a benefit that wild salmon cannot?  
keep going on...*

*I consider Minister Shea a criminal for having neglected this issue that we have been telling her about for years. I feel Minister Shea should be brought up on charges for neglecting her job. Her performance level is appalling. I resent as a tax payer that I have to pay her to play with her fanny and trip around the world at our expense ignoring our problems until its too late to recover from them. Shame on Shea I say.*

*THANK YOU*

*Lets get the truth in time.*

*Not sure where you get all the energy from to continue but I hope it continues. Thanks.*

*We, the people, have a right to be informed about an issue of this magnitude. Virus in fish has a devastating effect on all areas of life.*

*Get fishfarms out of our oceans*

*Deplorable*

*Dear Minister Shea, please be true to the principles which your government campaigned on and, thereby, which you are mandated to uphold -- namely, practicing transparency. If you continue to fail in this practice then we must conclude you have acquired your seat based on a false promise and thus it is not the case that you practice transparency but in fact operate in secrecy which reflects deceit on the part of your government. Please remedy this concern through acting honourably. Many thanks. G. James.*

*Access to feed lots and heir disease records is essential*

*Please allow Dr. K. Miller to do her job.*

*How on earth can we be sure that farmed salmon does not endanger wild salmon when the company's involved refuse to disclose their stats, except to scientists who are "in their pockets",*

*Make a decision that gives you peace.*

*Please help science do the work it needs on this very important issue. Remember the FRB!  
Do the right thing!!!*

*The DFO MUST release all data and reports to the Cohen Commission. NO excuses are acceptable.*

*When the fit really hits the shan, there will be no one in a higher position than you. It is in your power to do the right thing. Exercise the power the PEOPLE have given you and follow the path we have laid before you. There is not one thing that needs protecting more than our wild salmon, because without our wild salmon, we have nothing left to protect. No more games. Please, read your mandate and stick to it. Protect our wild fish.*

*This is unbelievable. I am sickened by the lack of accountability being demonstrated.*

*Shea You are F\*@#ed, you and Gordon Campbell deserve a bucket of sea lice thrown on you...!*

*There have been too many secrets for too long!!!*

*Feedlots out now!!*

*Please deal with this.*

*Our Government should be doing everything possible to account for the loss of Wild Salmon---  
this is their job as our representatives*

*Show that you care, please. Humans are not alone on this planet!*

*This is appalling!*

*Just another example of how our (LMAO) government serves the interests of the rich and powerful. "Talking about a revolution....."*

*I am so disgusted with DFO and the governments I'm afraid all I have to say is our country is run by corruption.*

*I read the newspaper article on the virus in salmon and am very frightened by this. the salmon are the life blood of this province. please please do research to assure that fish farms are not causing or making these viruses more prevalent. please.*

*I am appalled that Fisheries, once again, is not acting on behalf of wild salmon stocks.*

*Please check the pens for the Virus!! It only makes sense.*

*The BC government must respond and must force farms to reveal disease records, by law.*

*Please do it soon - we are counting on our Government to save our salmon*

*Life imitating art! "I have seen the enemy; he is us."*

*We must get to the bottom of this immediately, help us please.*

*This issue has serious implications for Canada's neighbors. Please move forward on the research and testing.*

*This is very important.*

*I am Regional Director for the area, all of my constituents are behind you Alex, especially our local Streamkeeper group who work to repair and improve spawning creeks on Lasqueti*

*I am at a loss for words. If the DFO knows of this retrovirus why don't they want to know more about it? After their decision making on the east coast wiped out that fishery why would they want the same thing to happen out west? Once the west coast wild salmon are destroyed there would be no need for a DFO any longer. Isn't this a most mysterious agency suicide? Who's getting paid off here?*

***MINISTER SHEA, DON'T PUT OUR PRECIOUS WILD SALMON AT RISK OF BEING WIPED OUT ENTIRELY!!!!***

*Urgent*

*For the love of the salmon, please look into this!*

*Coming from Salmon Arm, we are very interested in the problems with the wild salmon. Surely the government must realize that fish farms may very well be a big part of the problem and must allow access in order to test for the virus.*

*Even though I am from out of the province I feel I must support this petition. Whatever negatively effects one species affect us all. Please act on these recommendations.*

*Save wild salmon*

*The time is NOW to maintain and restore BC salmon runs for the BC communities that depend on healthy salmon (commercial fisherman, sport fisherman guides, outfitters, tour vendors, tourists*

*Time to test and act*

*I'm not surprised, but very saddened!*

*Why does Canada not have a law making it mandatory for salmon farms to report disease?*

*Please, let the scientists examine all possibilities pertaining to the salmon downturn. Then maybe there can be a solution if there is any political will????*

*Typically egregious*

*PLEASE HELP US SAVE OUR WILD SALMON, GILAKAS"LA (thank you)  
SAVE OUR WILD SALMON!!!!*

*Great need to continue insisting that information about farm salmon be available and transparent so we can protect our ecosystem and indigenous species*

*I fish in BC and spend thousands.*

*Why do we have to go through these hoops, This is more important than the HST...We need more information by having it corrected NOW!*

*Once again the PMO silences scientists!*

*Unbelievable the apparent incompetence of DFO!*

*Spending money on 50 new aquaculture jobs before giving adequate \$ and staff to investigate this virus is ridiculous!*

*Gail Shea and the DFO, are a complete failure, insofar as management of this great resource is indicated*

*We need B.C. coast minister as well as Atlantic minister*

*Please act NOW!*

*This all started in the 80's when aquaculture was introduced. Please stop this now. Wildlife will thank you.*

*Would the CBC News help by exposing this issue?*

*Retroviruses are the scourge of our age and everything must be done and done soon to identify and stop the spread of this possible new one.*

*This commission's duty is to gather every bit of evidence as to the tragic state of BC Wild Salmon  
Please show you care*

*This needs to be a funding priority*

*We need to see all of the disease records from salmon lots so that any potential issues can be worked on by other scientists and non-industry people. In order to gain our trust in salmon feed lots we require transparency*

*Once Again DFO is Guilty of withholding valuable information about salmon disease from us. This MUST not be allowed to continue and I for one will be voting for a change of Gov't at the next opportunity. DFO MUST allow access to all data and ensure that Feedlot salmon are tested.*

*It is time for the government of Canada and British Columbia to practice transparency in all aspects of government but especially and whole heartedly concerning the plight of the Pacific Wild Salmon*

*DFO needs to do their job*

*Where is the prom transparency we should expect from government?*

*We demand the government to take a leadership role in saving this natural resource*

*This is truly an important issue and warrants immediate attention. thank goodness we have people with integrity like Dr Miller willing to investigate this . Full cooperation and financial support should be made readily available to her. I say thumbs down to DFO!*

*Absolutely, this must be done. Please continue to press this issue at the Cohen Inquiry. Thank you.*

*we need truthful answers*

*I support the further research*

*Get on it!*

*We are concerned at the lack of good objective scientific research going into fisheries and fish farms in BC*

*Just do it.*

*I heard this on CBC on January 13, 2011. Having listened to the IDEAS show only days earlier, I was gob-smacked with the clear link to feedlots. What a despicable business not to protect our habitats and natural resources*

*Again you put Canada to shame as an ecological disaster with the work sustainable just that - just another word to absolve yourselves of greed  
The Canadian Citizens like and need to know the result of it all. I am asking that the result being published across Canada.*

*Please take this petition to heart and act accordingly!*

*Just another way to clear the Fraser River of Salmon so the private power can really expand and cash in.*

*Strongly support this!*

*Standing by while fish die doesn't seem to me to be good governance*

*This is outrageous to treat our salmon companions any differently than we treat the outbreak of flu virus' in the human population. The salmon could be more important overall to the health and wellbeing of the Planet.*

*It is sure time to clean house at the DFO in Ottawa and Vancouver. They are a disgrace to our country and to the Federal government .*

*Stop killing the planet for dollars which are already dead.*

*The implications of this are far reaching. We need to act based on long term results not short term gain.*

*It will be of great help to find out where these viruses are coming from*

*It is long past due for DFO to step up to the plate and make every effort to protect our wild salmon stocks!*

*When is this "Shea" going to get off the pot has anyone checked to see if she is a real live person and a Canadian citizen!!?*

*Take the Salmon Feedlots out to our ocean and watch to see how this helps our Ocean Salmon.*

*I would submit that the many environmental committees and organisations could find a manner of combining forces without losing their identity and beacon.*

*Why was your attempt to cross examine on the leaked memo refused by the Cohen Commission?  
The sooner, the better.*

*GO*

*Non-disclosure of disease and drugs from fish farms is completely insane.....totally arrogant....and absofrickinglutely criminal!*

*The gov't has for too long ignored the need to protect and care for the wild salmon. The farms have not been properly supervised to protect the waters for the use of all natural wildlife of our ocean.*

*Soon before we have no wild fish left*

*What on earth is going on at the DFO? Let DR. Miller do her work and PROTECT these wild fish!!*

*DFO does it again...*

*You really gotta do something to save the salmon fishery , look out for the future fisher people if not for us now....*

*Now that this information has become public, which it should have years ago, the requests above are self-evident. Please get on with it.*

*Our future as coastal people is linked to the health of our wild salmon population. Please act to assure their survival*

*Let's get to the bottom of this issue. If feedlots are a contributing factor to wild Pacific salmon decline then something needs to be done to rectify the situation a.s.a.p.*

*Why is it always such a battle to get those who are supposed to be working on our behalf to speak for us?*

*Please listen to science not just profit margins.*

*We need the government's help.*

*Faith in government hinges on matters such as these.*

*Please do the right thing before it's too late*

*Please, let's have the open accountable Govt. we were promised by your party!*

*TRANSPARENCY FOR FISH FARM DISEASE RECORDS!!!!!!*

*Thanks Alex!*

*You are doing a very good job keep up the great work.*

*DFO is mandated to protect wild fish. Its stalling and obfuscation are unconscionable. Wild salmon are a keystone species in BC, and i INSIST that all major science be brought to bear to discover the cause of their falling numbers.*

*Save our Wild Salmon !!*

*I wish I was surprised by how this information has been handled.*

*Minister Shea, PLEASE rise above short term political motivation and lead your ministry and all Canadians through the difficult task to ensure the flourishing survival of wild salmon stocks in perpetuity.*

*Information = power to the people*

*This is a deadly serious issue that calls for an immediate stop to any expansion of the fish farm Industry and that plans be put into place to remove fish feedlots from the oceans into containment on land.*

*Start to act like a representative of the people, Not a reckless corporate croonie with subversive agenda's that harm the environment and prevent viable, sustainably proven and economically prudent land based farms from operating and wild salmon from being impacted further with unknown virus that are most likely originating from open net fish farms. If not then let the science out in the open for all to observe. To date your actions are ethically irreversibly concocted to avoid accountability through transparency and sickens me to the point of calling your action criminally corrupt. Yours truly, Leanne Hodges, Former DFO Fisheries Gaurdian*

*Please act now.*

*PLEASE*

*Please action responsibly*

*Please take all necessary action as requested above immediately to protect the health of our wild salmon and all the animals, including humans that depend on them.*

*It is important that we don't let a virus spread over the whole population of wild pacific salmon and other species*

*In complete support of your request to the minister. Some independent observation is certainly needed as government and its agencies appear to be less than willing or able to investigate reliably on their own.*

*I totally agree with Alexandra's concern re feedlot salmon having this virus. As well, it is amazing that the salmon feedlots seem to be "a law unto themselves".*

*Our salmon must be protected!*

*Critical information must not be kept from the people of BC and the Cohen Inquiry*

*Get out, we want to have our salmon and resources to sustain for millennia again.*

*Salmon farms are a serious threat to BC salmon populations and so ought to be banned.*

*Corporations don't care - governments must.*

*Minister Shea: Allow Dr. Miller to test the feedlot salmon for this unidentified virus. DFO cannot be allowed to muddle this as they have sea lice.*

*DFO and the federal and provincial Govt' must stop protecting the fish farm industry at the cost of our wild salmon!*

*May I remind you that you and yours work for us and thus, we are entitled to all and any information gathered. And in addition, you are obliged to inform us in a timely manner. Anything less brings shame to all of us.*

*the truth MUST BE TOLD !!!! the sooner the inspection , the better . if the government stalls on this , well , what are they afraid of? the TRUTH ??? E.K.  
You have an obligation to act, on behalf of all Canadians.*

*I am a commercial fisherman and i am not pleased that you people are withholding vital information from us this is not right you are messing with my livelihood thanks alot !!!*

*I am outraged at the Conservative Government and Ministries withholding information from their employer, WE, the Canadian citizen. Arbitrary decisions on the climate and environment MUST stop. You are forming your legacy, but damaging our futures.*

*The National Non Profit Party <http://nationalnonprofitparty.ca/> supports this petition*

*I honestly don't know or trust DFO now or ever did*

*I would like to see more transparency.*

*this is appalling and has to be stopped - 4 years of doing nothing! ARG!!!  
Minister Shea's FIRST PRIORITY should be our wild salmon. Not investing her time entertaining Farmed Salmon enterprises!!*

*How do we cause an uprising of people that will upset parliament? Meanwhile, how about a full page ad in a mainstream newspaper saying, "When the Foxes are in charge of the Henhouse, don't believe their research that says foxes are good for hens", (contributed by my brother on behalf of Friends of Friends of Wild Salmon.)*

*I agree. We need to know what threats there are to our wild salmon--- These salmon are a resource belonging to the people and therefore anything affecting them should be public knowledge.*

*Yes I agree---It's about time that the Government becomes responsible to the resources that belong to the people rather than to the multinational corporations.*

*Honourable Minister Shea. Canadians are respectfully demanding your attention to this vital matter. Fund this properly and guarantee unfettered access to salmon feedlot populations. This*

*is a heinous disregard for the survival of wild salmon and the Treaty Rights of the First Peoples who, through entering into Treaties with the Crown, and through the Marshall Decision of the Supreme Court of Canada are entitled to fish for these most generous sacred wild fish as they have for thousands of years before contact with the Colonials. They and the next seven generations have this fundamental right. Forever. Keep the Salmon Wild.*

*save our salmon*

*I fully endorse this request  
Please be vigilant and thorough in protecting our salmon!*

*The salmon stocks are vital to our daily, seasonal and yearly culture and economy on the west coast. Any actions that support the WILD fisheries of BC will have my complete support as an active participant in democracy.*

*the government is to be working for us as people... listen to our voices and practice due diligence in your ministry*

*Thanks for prompt action.*

*This needs to happen if we are to properly manage our wild salmon stocks. We cannot allow another debacle like the east coast Cod fishery.*

*DFO needs to be advised that farmed salmon industry is too big a threat to Wild Pacific Salm and the Pacific Northwest ocean environment and these ocean feed lots need to be move:ot dot be pulled*

*Please think hard about future of your kids and grand children. We can do something about it, if we WANT to.*

*DFO needs to be instructed that farmed salmon industry is too big a threat to wild Pacific Salmon and the Pacific Northwest ocean environment, and that these ocean feed lots need to be moved onto land for closed system operation. A full public inquiry is also required into DFO's management as it concerns grossly insufficient protection of Pacific Northwest's natural marine environment and wild Pacific Salmon, and to use this latest reported virus to proactively initiate this much needed public agency policy, management restructuring with "true and responsible" defaulting to protecting the marine environment and wild Pacific Salmon - now!*

*Stop the secrecy!*

*Government owes the constituents this access.*

*Get er' done*

*There should be no fish farms but if they are to remain they should be inland only and a closed loop system.*

*Take the fish back from the Jimmy Pattisons of the world*

*DFO must act responsibly and transparently in dealing with a potentially devastating virus. Test farm salmon. Allow Dr. Miller to comment. Fisheries and Oceans Canada is mandated to protect aquatic ecosystems. Please do it.*

*Why are our politicians and DFO constantly ignoring all this sound science? There must be some huge payoffs from the fish farm producers.*

*Wild salmon are vital to our future*

*I have been a salmon fisherman all my adult life - the wild salmon support our amazing coastal ecosystem and the livelihood of many up and down the BC coast*

*Atlantic salmon can never replace our wild indigenous Pacific Salmon -- our government is morally bankrupt if it fails in this regard. Please do more than lip service and help protect this vital resource!*

*Declining Pacific salmon stocks impact our economy and the marine and mammals who subsist on them. This is a serious situation that our federal government needs to deal with now. Please show some leadership here.*

*let's save the salmon*

*This issue is extremely important to deal with NOW in an honest, open and scientific way. Please act now to open up the scientific investigation NOW!!!*

*keep up the good work*

*please consider the importance of this possible problem of a viral infection*

*thanks for doing this Ms. Morton*

*The DFO does not appear to have the public in mind when it comes to protecting our food source.*

*none*

*don't ever give up*

*The wild salmon of BC are a natural resource that must be protected. Fish farms are not natural and are harming the wild salmon. Please do what is necessary to protect this resource for future generations and the ecosystem.*

*The wild salmon are an invaluable resource of BC. They must be protected from the fish farms and antibiotics and sealice. The wild salmon are a resource that must be protected at all cost for future generations and the health of the ecosystem.*

*The wild salmon of BC are an invaluable resource. The fish farms are not natural and harm not only the small fry but also the environment. We must protect the wild salmon for future generations and the health of the ecosystems. Ellen*

*save the salmon*

*I just read about this potential virus in the news on MSN. This doesn't bode well for both people (consumers) and the wild salmon. This is dangerous territory and something needs to be done about it a.s.a.p. I would greatly appreciate this situation is dealt with diplomatically so that all parties are involved: government (federal & provincial, biologist(s), and DFO). Put the "farms" on land where they belong!!*

*Why is it that the salmon farming industry always has so much political support?*

*I am inspired by your dedication, and respect for our environment.*

*We need free and open access to all disease and virus records kept by salmon farms. They cannot be allowed to operate with disregard to their effects on wild salmon and other ocean species. Thank you*

*Get the fish farms out of the water. The time to represent the people's interest is now.*

*There is no time to lose.*

*This virus poses a tremendous risk to wild salmon throughout the Georgia Basin. As such it is the responsibility of your agency to do everything in your power to understand the source of the disease and take appropriate measures to intervene. This is just another piece of evidence that the salmon farming industry needs to be moved on land both for the benefit of wild fish and the long term viability of the industry. Please don't delay!*

*This needs to be done now!*

*We must investigate this -- Sockeye are susceptible to many viruses - this is one of the reasons they can not be raised effectively in hatcheries!*

*This is an essential step to protecting this vital resource. We simply must take every step possible to determine what is happening to our salmon and how to rectify it. Fast!*

*Protect Wild Salmon*

*Data and funding must be made available so that this question can be settled.*

*In the Bay of Fundy we have driven the wild salmon to the brink of extinction with DFO backed salmon Aquaculture! Please do not let this happen in BC. Free your scientists to do the work they are paid to do by the Canadian tax payers!*

*Thanks for your hard work Alexandra. Please stay at it.*

*This should be of grave concern across the country, from the cod-free Atlantic through the walleye-challenged Great Lakes*

*(<http://www.ofncommunity.com/forums/index.php?showtopic=40672>) Thank you for caring.... I think it is crucial to get to the bottom of this issue.*

*Unbelievable! Bannana Republics manage their resources with more open communication than our "Democratic" representatives*

*make them release the study reports*

*hurry*

*Lack of transparency on this issue at this critical time will not be helpful to the salmon or those that depend on them.*

*keep up the good work!*

*There is too much at stake to ignore scientific information. We hold DFO accountable for the future of our wild salmon.*

*I appreciate all of your good work on the behalf of the salmon, the health of our coast and our world. Thanks*

*Wild Salmon are the main food source of the Nuxalk Nation. Generations of Nuxalkmc have lived on all marine life. D.F.O. needs to save our salmon to prevent the demise of the Nuxalk Nation. As go the Salmon, so go the Nuxalk.*

*The intentional suppression of information regarding disease on fish farms is an outrage, and an insult to the people of British Columbia.*

*This is your job. As one of the many who are signing your paycheque, I would like to see you actually doing it for a change.*

*go*

*We stand for live salmon stocks forever in BC ocean*

*Please listen to Dr. Morton. She is well researched, has studied the subject for many years, and has no hidden agenda or conflicts of interest.*

*Please find the cause !!!*

*Stop this madness! Protect our natural salmon!  
Please allow science to properly inform policy.*

*Support wild salmon*

*I would expect future populations to be as critical as developing adequate tanks for AgriMarine. Please ask Sustainable Development Technology Canada to invest in everyone.*

*Our salmon are suffering! We deserve to know the truth. If it is within our grasps to understand and make a difference, then it must be done!*

*I feel that DFO are more interested in protecting the fish farm industry than in protecting the wild salmon stocks.*

*Please do everything in your power to keep the salmon from extinction. They are so important and must be protected.*

*This is important. Do not sell out our environment.*

*I'm a Canadian citizen and former BC resident.*

*Please do not make a decision that will rob our future generations from fishing, seeing and learning about British Columbia's wild Salmon.*

*I agree with the letter to Minister Shea.*

*Let's save the salmon! Forget the politics! Forget Norway!*

*Save salmon from the dead fish office*

*We can't afford to waste any more time*

*Please help stop the spread of this virus.*

*I wish to help saving the Salmon*

*Keep up the pressure!*

*Please stop farming salmon for a few years to see what effect it has.*

*Stop Open Net Fish Farming*

*Save our wild salmon from the diseases spread by farmed salmon.*

*Every effort should be made to remove all open pen fish farming from all Canadian waters.*

*Wild Salmon First.*

*This MUST be addressed IMMEDIATELY.*

*Do for the salmon what was not done for the cod*

*Your primary responsibility is to the people of Canada. The interests of corporate fish farms must be secondary to this responsibility.*

*Please do not ever give up - we need you and will support you always.*

*The DFO should have the protection of wild, natural resources as their primary concern, with income/profits, even local employment, being subordinate to protection of natural resources.*

*Let's get real!*

*thanks, Alexandra*

*Surely the public have a right to information about the salmon feedlots and related health issues.*

*please support transparency in all salmon issues  
BC's natural resources belong to BC; fuelling the greed and profit for a multinational corporation should never supersede local inhabitants. Please use the precautionary principle, for me, my daughter, and generations to come.*

*SHEA; PUT FISH FARMS ON SHORE, OR IN COMPLETELY CLOSED CONTAINERS, THE WORD IS CONTAINERS*

*Let's DO it!*

*leave our SALMON WILD*

*Well done !*

*Thanks once again for putting this out there, Alexandra! May the truth and justice prevail.*

*Thank You*

*is dfo competent*

*Your management of commercial fisheries and aquaculture is disgraceful. Fortunately, thanks to the continued work of ballsy environmentalists and a new era of information sharing; comes a new generation of passionate and well informed conservationists...and we will come after you with the same persistence and dedication for many decades to come.*

*Let us have all of the facts on this issue.*

*time to be honest with the people of this country*

*test the fish - make results public*

*Let's be responsible Stewards of our Natural Resources!*

*It is time for you and your ministry to start protecting our natural wild salmon. It is your duty to the people of Canada and I expect it from you, as an elected official.*

*Save our fishery!*

*Sadly, more efforts from the government to prevent science from solving problems they don't want to know about.*

*Time to control fish farms and their ecological harm is long overdue.*

*TEST NOW not after the Salmon are lost.*

*It would sure be nice if politicians could prove they were not corrupt and/or useless without requiring a petition.*

*Look at what happened in Chile due to Virus that Marine Harvest and Government were too slow to respond to. Face the facts that feedlots don't belong in the ocean and support the*

*scientists who are looking at the genetic change in Salmon and require Fish Farms to release all disease and treatment data immediately. This "salmon flu" virus seems in every way parallel to avian and swine flu, which is caused by over-crowding in industrial agriculture feedlots and overuse of antibiotics and a chemical regime for the maintenance of penned animals. Keep up the pressure...persistence will prevail...*

*As a former salmon farmer, I once supported this industry. As one becomes wiser to the truth as to what is happening on these farms and the interaction with the surrounding waters I no longer support the industry. We need to come clean on what is really happening out there and above all else PROTECT THE WILD SALMON.*

*The Fisheries Minister needs to protect the natural fish, streams, rivers, lakes and oceans of that country before anything. Introducing foreign species with their associated predators and pests is not part of the natural surroundings of our pristine waters. Stop the POLLUTION that you as the Fisheries Minister is allowing.*

*Sincere wishes that wild salmon will be protected for all time.*

*Thank you*

*Why are you hiding this information, Minister Shea? I have been a Conservative supporter all my adult life and had hoped that with a Conservative Government things would change from the succession of Librano minister. It is most distressing to note that as far as this outlaw industry is concerned, it's business as usual with your Government! Please make these people accountable and get the salmon farming feedlots out of our coastal waters NOW!*

*I am not a relative of Alexandra Morton. Gail Shea you are responsible to the people of this country, not just the multinational corporations. Make your mark on the side of caution!!!*

*I urge our federal and provincial governments to cease supporting salmon feedlots and address the real issues leading to the future demise of our wild salmon stocks.*

*If there is nothing to hide, then there is no reason to not release the info*

*Only through unhindered scientific investigation do we have a hope of managing our marine resources effectively.*

*Keep up the fight*

*We need to know the facts that will come from scientific testing for this virus*

*Good for you*

*DFO -please wake up before it's too late!*

*It is time to stop deliberately decimating the wild salmon species on the west coast. Get rid of the open ocean, open net salmon farms. Enforce the testing.*

*The Minister must act respond with a positive approach to this*

*get it together*

*Stop killing our native fish!!*

*Minister Shea, If there was any doubt about the virus coming from the salmon feedlots, why wouldn't you test them? Can anyone say "follow the money".*

*All Fish Farms must be removed from the BC Coastline to protect our wild salmon!!*

*Think long term, Think Positive Change*

*Only criminals hide the truth*

*Don't trust commercial feedlot bumph*

*NO FISH FARMS*

*I fully agree with the above statement*

*Ministers work for Canadians not foreign interests or do they? Money talks*

*Time is running out!*

*Do The Right Thing!*

*Let's get serious about the health of both farmed and native salmon, and the overall marine bioscape*

*Keep our oceans healthy--we gave you that task. We can take it away.*

*PLEASE DO LIVE UP TO YOUR RESPONSIBILITIES, AND HAVE A THOROUGH LOOK AT THIS YOURSELF.*

*Concerned dual/ global Canadian & U.S. citizen ...*

*Put the "farms" on land where they belong!!*

*I fully support your efforts to get the facts out so the public can be involved, also the industry needs to move to contained fish farms on land.*

*I fully support your efforts to get the facts out so the public can be involved, also the industry needs to move to contained fish farms on land.*

*Get rid of Hopeless Harper and Shea ,you get rid of the lice*

*Get with it!*

*Take care of our fish.*

*thank you for all your hard work!*

*thanks for your efforts*

*Please stop salmon farming unless they are inland!  
thak you*

*test our salmon!!!*

*shape up Shea!*

*Please proceed with honesty and integrity.*

*what happened to DFO's proclamation of 'science excellence' if they muffle scientific observation?*

*Yes, our fish must be tested*

*This step is essential. Failing it I would like all Salmon Farming on the coast closed down immediately. Private enterprise has no right to endanger the ecosystems we ALL depend upon for our health and well-being. Please put the public and environmental needs above profit considerations. Thank you for your consideration and prompt action on our concerns.*

*Future fish stock depends on this*

*Salmon disappeared in Sechelt inlet coincidentally with the arrival of salmon pens. We want our salmon back!*

*Please address*

*Wake up....make a name for yourself in history and DO SOMETHING besides what big money and their followers want. Do it for the planet....STOP this killer cancer NOW< PLEEEASE it's the "ostrich" approach ... hiding until the danger passes ... and we know it won't. It is time to do something positive in ending fish farming*

*You can fool some of the People some of the time but you can't fool all of the People all of the time*

*Wild salmon are SOOOOO important -- economically, socially, spiritually. Please do the right thing.*

*Keep up the good work*

*"This site is spawning lies and killing wild salmon: - <http://www.bcsalmonfacts.ca/>*

*Keep up the good work*

*These companies have been receiving preferential treatment from both Provincial and Federal government. How is it that they have been totally free to refuse to allow their records of disease*

*in their farmed fish to go unchecked by Government scientists. This could not happen with any other animal products which might be harming the environment in which the animals are produced. As a citizen of Canada, and a voter, I totally disagree with Government inaction and silence over the past years that this controversy has been occurring !!!! why ruin our environment, incl. our fish? the income from farmed fish is short term compared to what the long term expenses will be, both monetary and the health of our oceans, but then governments are known for their short term planning.*

*Minister Shea, please start representing Canadian people, not corporate interests. Thank you,  
Rong*

*Help save our Wild Salmon!!*

*I lived in BC for a number of years and hope that this problem is taken seriously. Your fish are everyone's future.*

*All information about farmed and wild salmon should be given to the public. There should be no secrets.*

*good science over corporate profits ... our environment and children need us to be responsible humans.*

*Save OUR fish!*

*We need to know and have a right to know if such viral contagions are present in farmed salmon feed lots. The Chilean fishery was devastated by viral infections and we need to protect our wild salmon from any possibility of infection that may devastate wild populations.*

*Do something!!!!!!!!!!*

*Our wild salmon need protection. The secrecy around the feedlots is wrong. Release the information on viruses in the salmon farms of B.C.*

*Let the fish farms come understand the same scrutiny that farms with mad cow disease had!*

*save wild salmon*

*please act*

*Please, believe the scientists, they have superior cunning and knowledge that comes from years of study. Please listen to them and to not allow them access to information is criminal...What is being hidden.?*

*Fish farms will only be acceptable on land and with closed systems*

*I am so glad you are spearheading this.*

*It is time that we take back our planet. It is us, the people and all the critters around us that must live here. Corporations do not breathe air, eat food, raise young. Let us act accordingly.*

*I believe that what you are allowing to happen on these salmon farms is criminal. They must be very big financial supporters of the Conservative Party.*

*Farmed salmon should ONLY be raised in inland, closed containment ponds. This will ensure that wild salmon stocks will not be affected by commercial interests.*

*This is an extremely important issue.*

*To not explore every possible factor that might affect wild salmon health is criminal. Minister, fulfill your obligation to do what is right for your people!*

*Stop the damn fish farms*

*What do you have to hide  
Can't think of anything true and polite.  
save our salmon  
Dear Minister Shea,*

*The fishing off our waters should be stopped!  
The salmon need a champion Thank You  
Because we do not inherit our home from our ancestors, but rather borrow it from our children.*

*This is our children's future, I want total transparency when it comes to our food, be responsible to the earth and it denizens  
everything is said now take action!*

*This is a serious issue and it is very important that be dealt with fully and with full public disclosure.  
It's all about control of the entire food system*

*Our oceans are in decline the environment around the world is seeing rapid changes which appear to be , or at least may be, the result of human activity. To expand on any activity which may be a contributing factor to these changes is totally irresponsible. Please take the politics out of decisions of which impact the environment and let the science be the deciding factor. Where the science has not been completed the only responsible course is to do the science first then proceed.*

*Minister Shea has an extensive background in aquaculture---- isn't it time to get the fox out of the henhouse?*

*Failure to provide access and testing as requesting above can only be described as negligent and a criminal act.*

*I have little hope anyone will listen.  
The way that this precious resource has ben mis-managed is ismply inexcusable. The people of this great province deserve better and we want action NOW.*

*Holding back of this information is undemocratic, not to mention lacking in transparency. I expect better from my government.*

*Why does Canada give one of our national resources to offshore companies?  
Safety First!*

*keep up the good work*

*Salmon Farms out of the ocean*

*Suppression of information cannot be tolerated!!  
Get rid of them any way possible*

*I applaud your dedicated efforts. I love this coast*

*Best of luck!*

*Thanks!*

*I am very concerned that not enough has been done by fisheries to study the impact salmon farming has done to B.C.*

*Shame on you Norway.*

*We have to get these fish farms out of the B.C. waters as they are poisonous to our salmon.  
Please don't let us end up as they did in Atlantic Canada*

*Please stop the salmon farms before they kill off all the natural salmon!!  
Please, please, please show leadership in this vital area...of concern to us all.  
The final result must be on land sites only.!*

*Dear Minister Shea, We would remind you Minister that you are elected to represent the people of Canada and their interests, NOT by Norwegian fish farm companies! Yours sincerely Philip Lake*

*Why are our govt reps so hesitant to protect our essential resources?*

*Get these Fish pens onto dry land, and give our wild salmon a chance.  
Open net fish farming must stop, Foreign investors are ruining our coast!!!*

*Think of the children!*

*As has been said wild Pacific salmon are the backbone of the BC coast. This resource is far too precious and vulnerable to be further impacted by this virus. Please give free access and allow your scientists to research whether or not the virus exists in the Atlantic salmon net pens. The precautionary principle should be extended to every situation where wild Pacific salmon can be harmed or impacted on by human negligence!*

*I am amazed that this government would not understand the importance of salmon to this province.*

*Save BC from foreign interest*

*thank you for organizing this petition*

*All Good*

*Wild salmon are an absolute necessity for the whole ecology of the Pacific northwest. Please do the right thing, and work with us to sustain the wild salmon, which will require enforcing environmental regulations around the salmon farming industry.*

*A newly identified virus has been found as the probable infectious agent to cause heart and skeletal muscle inflammation outbreaks in farmed salmon (PLOS, July 2010). As the authors of this report point out, this new virus poses a major threat not just to farmed salmon, but to wild salmon populations as well. Our wild salmon populations must be protected first and foremost. Canada is one of the few remaining nations with wild salmon runs. Wild salmon fit into a vital ecological niche sustaining life for many other animals and providing enjoyment for sports fishermen and a living for First Nations and commercial fisheries. Our government should be providing our own research scientists with the needed tools to get out in the field and identify the full impact of this new threat to our wild salmon stocks. Complacency will not sustain our wild salmon. Please take action as this petition urges!*

*THE RISK IS WAY TO BIG TO ALLOW THESE FARMS TO CONTINUE OPERATING IN OUR WATERS WHY ARE WE EVEN THINKING OF CONTINUING IN THE SAME DIRECTION ?????*

*There's a msg on the youtube video (propaganda video) put out by the fish farming companies. The comment states "get your dirty diapers out of our ocean". I totally agree. When will elected politicians start listening to "we the people" who elect them, and stop licking the hands of the corporate lobbyists? We DO NOT want fish farming in the waters of British Columbia!! When the salmon are infected and can no longer serve as food, which species will we next target?*

*We have to get full disclosure from the Salmon Feedlots. It's criminal to let them continue without us knowing what they are doing to our coastal waters.*

*We need to protect our wild salmon at all costs*

*That you as Minister of Fisheries would not only condone but promote an industry that puts our wild salmon at risk is disgraceful - if this were lobsters in PEI you, I am sure would be acting a little different.*

*Honourable Minister Shea, of the Government of Canada, you are responsible to Canadians first, before Norwegian companies and their shareholders. Canadians are counting on you to protect wild salmon in British Columbia waters.*

*Do. Your. Job.*

*Stop the salmon industry, now !*

*I AM FROM THE USA. BUT THIS IS A GLOBAL MATTER AND I EAT A LOT OF SALMON NONE OF WHICH IS FARM RAISED BECAUSE THERE JUST IS NOT THE SAME OMEGA OR FOOD VALUES!!!! I FEEL IT WHEN I USED TO EAT FARM RAISED, IT JUST DOESN'T COMPARE.*

*This is an appalling situation in which narrow, dead-end corporate interests are allowed to trump, or even eliminate, sound science. It should end now!*

*I wish our government had the foresightedness to value our wild salmon and do everything in their power to ensure their existence. as a canadian citizen I want my elected officials to be forthright and honest about what is happening to our wild salmon.*

*The farm salmon lots are killing our natural salmon population*

*"When will they ever learn?.....*

*Please consider this.*

*we shouldn't even need to ask for this test it should be your porogative to test the fish regularly and protect our natural ecosystem*

*common sense please*

*Our salmon are depending on you and I am hopeful that you will comply with our requests. thank you.*

*We must do everything in our power to protect the fish stocks in our country and in the world.*

*thank you*

*Minister Shea-This will be an election issue. Dr. James Lunney will feel the impact of your inaction.*

*We want these farms off our coast and WE WANT OUR FISH BACK !*

*Please do not be conned by this organization and do the right thing. If they are importing viruses into our ocean they must be made to stop before we go the way of other areas they have infested.*

*Demonstrate some backbone.*

*Transparency, unless you have something to hide. Nothing less is acceptable.*

*As we kill various species, we are killing ourselves. This testing \*must\* go forrward. Please keep me posted.*

*If there is no problem with the feed lots then any kind of testing should not be a problem. If there is something to hide then we do have a problem. This is our province,our waters and our fish.*

*Please get these fish farms and their destruction packed up and move them back to Norway.*

*There is way more money in natural fish and their economic benefit to the province,just look at the impact the 2010 Sockeye run had. The benefits reach very deep into the province and puts money into the pockets of thousands of Britishcolumbians. This is where it belongs and we won't rest til we have back what is ours!!!*

*Noted Farm Fish Association newspaper add suggesting a one-to-one feed to pound of edible fish. I guess that's after the fish food has been refined from gathered 5 or 6 lbs of material gathered from the sea has been trashed.*

*Please remember your oath!*

*Let the scientific method reveal the truth !*

*Thank you minister for your attention to this matter*

*I will, and I suggest all others as well, email their MP's too on this issue!*

*Salmon Farms must not be allowed to hide their disease and virus statistics from the public. This information is needed for the public to know what is going on and for those in charge to make informed decisions.*

*I do not support open net salmon farming in British Columbia and will not vote Conservative this year because of the stance of the Federal government on this issue*

*Please resign*

*Do we really need more tests to decide if we should support farm fish?*

*How about a petition to simply ban fish farms.*

*This Government and the BC Government is corrupt. We need the TRUTH!*

*Charges must be brought to bear against Fish Farms that refuse to give data to DFO on request or refuse to allow F&O Canada to board & inspect the fish therein for deleterious organisms and /or chemicals*

*please listen to the citizens.*

*We need to get rid of the ocean fish farms!*

*It's about time that the Conservative Gov't and DFO put a stop to these open net fish Farms.*

*Let our salmon swim freely!*

*Get with it!*

*get the fish farms out of BC*

*Protect our wild salmon*

*Enough of this travesty!*

*Strongly support your action to ask the Gov't to DO THEIR JOB.*

*I await your response*

*Get rid of all feedlots, wild is the only way to keep it sustainable.*

*Salmon underpin much of the wealth of biological diversity in our UNESCO designated biosphere. Under the International Convention on Biological Diversity to which Canada and British Columbia are signatories your government is obligated to actively pursue every available avenue to remove threats to the integrity of biosphere and maintain functioning ecosystems.*

*Please start telling the truth  
No open net pen farmed salmon*
